Known Bugs and Fixes

We know even little bugs can be annoying. But sometimes, it takes a quite a bit of effort to fix bugs. The purpose of this document is to identify some minor bugs and suggest some fixes.

If you have any ideas, complaints or comments, please send email to:

Classroom-salon@andrew.cmu.edu

BUG #1: "The scroll bar while reading does not always work."

SOLUTION: We believe this is a adobe flash bug that occurs in rare occasions. We are trying to isolate the problem. In the meantime here is a solution that seem to work.

**WHEN SCROLL BAR IS NOT ALLOWING YOU TO DRAG IT DOWN
---- JUST TAP IN THE TEXT AREA AND IT SHOULD WORK**

BUG #2: "Internet Explorer does not work"

SOLUTION: We believe this is a IE 9.0 error. We are trying to isolate the problem. In the meantime here is a solution that seem to work.

**USE A DIFFERENT BROWSER LIKE FIREFOX OR CHROME
---- OR RUN THE IE BROWSER 9.0 in 8.0 MODE.**
